

## West River Conveyors and Machinery Company

*West River Conveyors + Machinery Co. Plant, Oakwood, Virginia*

West River Conveyors and Machinery Company, located in Oakwood, VA, has a 39-year history of providing quality, affordable, top-notch equipment. The company is led by Jerry Roulett, co-founder and President, and Joe Street, co-founder and Vice President of Sales. Founded in 1981 as West River Machinery Company, it was established to manufacture conveyor systems and rebuild mining equipment. During the early years, the company rebuilt all types of mining equipment with pieces of conveyor systems involved in the rebuild process. From there it began to build brand new, quality belt drives and other conveyor components. Its competitive price and quality products have given the company an advantage in the conveyor and conveyor component market. Products include: belt drives, take-ups, tail sections, conveyor systems, belt structure, conveyor belting, and belt surveys. West River recently upgraded their fabrication equipment to include a new PCR42 advanced plasma cutting robot that will complete fabrication jobs with more accuracy, speed and efficiency. PCR42 reads detailed files and can cope, make bolt holes, slots, notches, prep marks for connection plates, fish mouth cuts and saddle cuts.

Over the years, West River has extended its manufacturing business to include the buying and selling of used conveyor parts and speed reducers. In the early 1980's, it began to purchase used speed reducers and has gradually enhanced its inventory to include hundreds of speed reducers in a variety of brands, models, ratios, and horsepower. In 2000, the entire parts inventory was put online to ease searching for products and parts. In the late 1990's after steady growth, the West River operations were consolidated from four locations to one with additional land being purchased from CONSOL Energy. In 2002, West River began operations in its new facility after two years of renovations and additions. The move to the new premises allowed it to better and more efficiently serve its customers with all operations onsite. There is now more than 100,000 sq. ft. of manufacturing and warehouse space.

Always looking forward to the future, West River is committed to building quality, long-lasting products at a competitive price and to the highest industry standards. The company partners with the best companies in the industry and uses state-of-the-art technology. West River is devoted to fostering established business relationships and creating new ones with the highest level of integrity and providing greater safety at all times.
